Scratched Glass Waiver

Releasing *Heights Residential* From Any Liability for Damaged or Defective Glass

Razor blades are a standard window cleaning tool which may be employed to remove stickers, paint, and other stubborn materials from glass. Razor blades will not cause damage to glass, provided that the glass does not contain fabricating debris. Microscopic fabricating debris is a manufacturing defect, and as such, is beyond the control of Heights Residential.

☐ Please use razor blades to ensure a thorough cleaning. I understand and accept the potential risks of scratched glass.

☐ Please DO NOT use razor blades. I accept that a thorough cleaning may not be possible and that no other methods of cleaning will be offered.

In signing this waiver, it is understood that Heights Residential cannot determine before hand if there is fabricating debris on windows. Furthermore, it is understood that Heights Residential will not be held liable for *any* scratches or other permanent marks on the windows.
